

INVITATION

Nordic built project partners, Grundejernes Investeringsfond and the City of Copenhagen invites you to the Nordic conference

LIVING IN LIGHT PEOPLE BEFORE BUILDINGS

**May 23
2017
Copenhagen**

The conference will investigate daylight as a starting point when transforming existing buildings and houses for modern living. Keynote presentations, breakout sessions, networking, and the building industries 1:1 solutions will inspire and challenge the way we think, design and build with daylight today.

Ellebo Garden Room, KAB, Ballerup

Living in Light, Valby Project

THE CHALLENGE TODAY

The building industry and existing buildings today are defined and affected by a growing population and at the same time trying to keep up with legislative demands and technological development. The conditions are pressuring the building sector and set the bar high for what we demand of our livable buildings. The building sector has an important responsibility in ensuring the quality of life for people while transforming existing buildings.

Right now, apartments in the condensed areas are often inadequate, so we need to answer the question: How do we put to the fore our holistic approach to human beings and daylight while transforming our existing buildings and houses?

The conference focuses on the potential of daylight to transform the existing and future buildings to meet the needs of human beings. The conference offers you the opportunity to discuss visions with the Nordic building sector, already known for its humanistic and sustainable approach.

OUTCOME

- **Nordic co-creation of visions** for the potential of daylight for the Nordic cities and building sector - putting people before buildings
- **Insights into potentials** for building sustainably through the vision of living in light with regard to sustainability bottom lines - and the Nordic Built charter points
- **Learn** from visions, test experiences, analysis and applied solutions

PROGRAMME

The conference takes you through the phases:

AWARENESS

Why is a new mindset necessary? A historical-philosophical kickstart of awareness

Carsten Thau, professor at KADK - The Royal Danish Academy of Fine Arts

What is the transformation needed to ensure and grow the quality of future living in Nordic Cities?

Trine Pertou Mach, manager at the Nordic Built Foundation

Discovering light that shape our lives and buildings - a photographic journey

Bert Teunissen, photographer

POTENTIALS

Daylight in buildings - a driver for human health and wellbeing. Newest research in applied lighting design and architecture

Federico Favero, lecturer and program coordinator at the Royal Institute of Technology

BREAKOUT SESSIONS - Learn from experiences and co-create with:

Nordic Built Active Roofs and Facades in Sustainable Buildings

Cenergia, Copenhagen City Properties (KEjd), KAB, WSP Group, VTT, ZED Consulting, AVENTA, Hoyer Finseth, Ecovent, Gate 21, FBBB, Kuben Management, Demos, Gaia Solar

Nordic Built Living in Light

Kuben Management, VELUX Danmark, VELUX Norge, Reiulf Ramstad Architects, Svendborg Architects, Nordström Kelly Arkitekter, NCC Construction, VELFAC, Cenergia, Gate 21, Torben Thyregod and Ishøy & Madsen

TRANSFORMATION

Realising the vision for light in future architecture

Reiulf Ramstad, architect and managing director at Ramstad Architects

Towards future transformations

Tor Nørretranders, author and lecturer

SHOWCASES

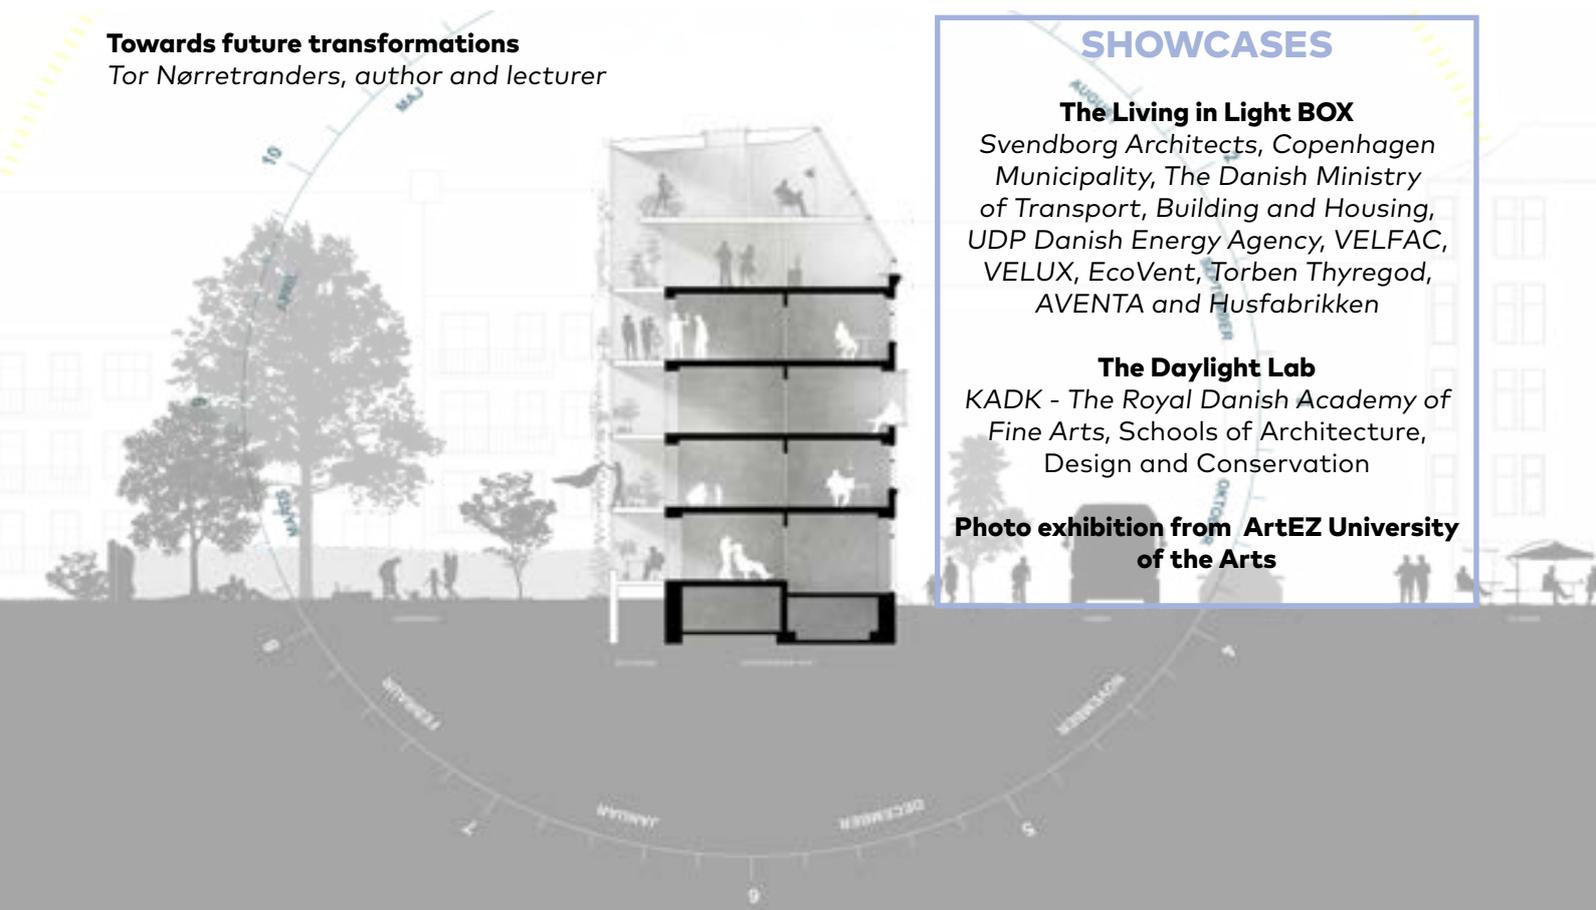

The Living in Light BOX

Svendborg Architects, Copenhagen Municipality, The Danish Ministry of Transport, Building and Housing, UDP Danish Energy Agency, VELFAC, VELUX, EcoVent, Torben Thyregod, AVENTA and Husfabrikken

The Daylight Lab

KADK - The Royal Danish Academy of Fine Arts, Schools of Architecture, Design and Conservation

Photo exhibition from ArtEZ University of the Arts

CONFERENCE PARTNERS

The conference is financed through the Nordic Built projects "[Living in Light](#)" and "[Active Roofs & Facades in Sustainable Renovation](#)" and [Grundejernes Investeringsfond](#).

The conference is further organized through a strategic partnership with:

The Royal Danish Academy of Fine Arts, Schools of Architecture, Design and Conservation (KADK), The Oslo School of Architecture and Design (AHO), The Municipality of Copenhagen and The Danish Ministry of Transport, Building and Housing.

KEY NOTE SPEAKERS

BERT TEUNISSEN

Nowhere in Europe exists a visual archive comparable to that of Bert that has the potential to show future generations a culture of living in light that has existed for centuries.

Economic development, globalisation, the introduction of European regulations, new technologies and the destruction of landscape are all factors changing homes and lives. What insights of life in light does the visual archive bring to the fore?

TRINE PERTOU MACH

Trine is deeply engaged in sustainability and the human perspective as core to everything we do – from buildings, over livable cities, to Nordic and global policies.

She is former senior innovation adviser in Nordic Innovation and manager of Nordic Built and has a specialisation in human rights.

REIULF RAMSTAD

Reiulf is a Norwegian architect. In 1995, he graduated from the Venice School of Architecture and founded Reiulf Ramstad architect firm. Reiulf have earned a reputation for creating bold, simple architecture with a strong connection to the Scandinavian context and the impressive Scandinavian landscape in particular.

Common for all his projects are that they are driven by a genuine dedication to humanist values.

TOR NØRRETRANDERS

Tor (born 1955) is an independent author, thinker and lecturer based in Copenhagen, Denmark. Among his 20+ books, the best known is "The User Illusion" about consciousness, perception and information (1998).

His most recent book, co-authored with artist Olafur Eliasson, is "Light! The light in life and the life in light" (2015).

FEDERICO FAVERO

Federico is a lecturer and program coordinator for the master in Architectural Lighting Design at KTH Royal Institute of Technology in Stockholm.

The education attracts students from all over the world with its humanistic approach to daylight as fundamental to architecture and essential for human well-being.

CARSTEN THAU

Carsten Thau is professor at KADK in Copenhagen, where he has inspired generations of architecture students, along with a broad public audience, with his unique insights in architecture as a meeting point of time and space and his ability to tell us the story.

Carsten is building bridges between the past, the present and the future of architecture leading towards the potential of transformation in/by people and buildings.

***It is a nordic conference, but speeches will mainly be in english.**
